7 Career Services

An integral and fundamental part of our philosophy is maintaining direct contact from the very beginning with the industry and working side by side with our students so that they can start developing or redirecting their careers from the get-go.

The goal of U-tad's Career Services is to help students develop a relationship with businesses throughout their studies by providing different opportunities, such as internships, employment, business projects developed in class and career counselling. This department prepares you

for an immediate and fast immersion into the workplace with the idea that before you finish your studies, you have a clear idea of what you will do upon graduation and you are aware of your professional possibilities, thus avoiding the insecurity often associated with entering into the workplace.

Contact: sdp@u-tad.com

In addition, the Career Services brings you the **Career Center U-tad**, an online platform where you will find internship and job offers, professional events of interest and a complete library of useful resources for your professional development. You can also request a meeting with our team of career counselors.
